## Product Overview of Polycom Trio

The Polycom Trio Solution supports audio-only conference calls with Open-SIP voice platforms along with point-to-point, bridge, and video calls.

The following are the features available on Polycom Trio 8500 and Polycom Trio 8800 systems.

### ***Polycom Trio 8500 Features and Capabilities***

The Polycom Trio 8500 system supports the following features:

- Placing, answering, and managing audio calls
- Initiating, joining, and managing audio conference calls
- Recording audio calls with USB flash drives
- Viewing and joining scheduled Calendar meetings
- Managing contacts, call lists, and directories
- Adjusting call and system settings
- Pairing with Bluetooth-enabled devices
- Checking voicemail messages
- Connecting to a computer over USB
- Sharing content during video calls
- Placing, answering, and managing video calls
- Pairing with the Polycom Trio Visual+ content and video accessory
- Placing video calls with a Polycom® EagleEye™ Mini USB camera or Logitech C930e webcam
- Adjusting the camera and setting camera presets for a connected USB camera

## ***Polycom Trio 8800 Features and Capabilities***

The Polycom Trio 8800 system supports the following features:

- Placing, answering, and managing audio calls
- Initiating, joining, and managing audio conference calls
- Recording audio calls with USB flash drives
- Viewing and joining scheduled Calendar meetings
- Managing contacts, call lists, and directories
- Adjusting call and system settings
- Checking voicemail messages
- Connecting to a computer over USB
- Sharing content during video calls
- Sharing content from Apple® AirPlay® or Miracast®-certified devices
- Placing, answering, and managing video calls
- Pairing with Bluetooth and Near Field Communication (NFC)-enabled devices
- Connecting to a wireless network
- Pairing with the Polycom Trio Visual+ content and video accessory
- Placing video calls with a Polycom® EagleEye™ Mini USB camera or Logitech C930e webcam
- Placing video calls with a Polycom® EagleEye™ IV USB camera or Polycom® EagleEye™ Director II camera system
- Adjusting the camera and setting camera presets for a connected USB camera

## Enter Information Using the Onscreen Keyboard

The onscreen keyboard enables you to enter information into text fields using the touchscreen.

The onscreen keyboard displays on screen automatically when a text field is shown. When a text field requires only numbers, the onscreen keyboard displays only numbers.

-  Displays alphabetical letters
-  Shifts to uppercase letters
-  Shifts to lowercase letters
-  Displays numbers and punctuation marks
-  Displays special characters

### Procedure

- 1 Tap a text field.
- 2 Tap each character you want to enter.

### Related Topics

[Getting Started with Polycom Trio](#)

## ***Change the Phone Language and Keyboard Layouts***

When you set the phone language and country, the phone uses the default keyboard layout for that language. For example, setting the phone language to French sets the phone to the AZERTY keyboard layout. You can enable multiple languages for the phone and switch between keyboard layouts.

### Procedure

- 1 On the phone's keyboard, long-press and release the comma key and choose **Input Languages**.
- 2 Uncheck **Use System Language**.
- 3 Select one or more available languages and press the Back arrow. Each language you select is enabled along with its default keyboard layout.

When you enable more than one language, a globe key displays on the phone keyboard.

- 4 Do one of the following:
  - Long-press the globe key to view and choose from a list of enabled languages. The phone uses the default keyboard layout for the language you choose.
  - Short-press the globe key to rotate through enabled languages. The space bar displays the current language and keyboard layout.

## Related Topics

[Enter Information Using the Onscreen Keyboard](#)

## ***Close the Onscreen Keyboard***

When you are done entering information into a text field, or you want to exit the current screen and return to the previous screen, close the onscreen keyboard.

## Procedure

- Tap **Done**.

## Related Topics

# Logging Into and Locking the System

---

You can log in to and lock a Polycom Trio system with your user credentials provided by your system administrator.

## Logging in to Polycom Trio

## Logging in to Polycom Trio

If your system administrator has set up user credentials for your phone, you can log in to a phone and access your contacts or favorites, settings, and calendar, if enabled.

You can view your personal settings from any phone or system within your organization. Contact your system administrator for your user credentials.

---

<b>Note</b>	Some of the features described in this section require access to the Basic settings menu. If your phone requires a password to access the Basic settings menu, contact your system administrator for assistance.
-------------	--

---

### Related Topics

[Logging Into and Locking the System](#)

## *Log In to a Phone*

Depending on how your system administrator set up the User Login feature, you may need to log in to a Polycom phone before you can use one.

By default, Polycom devices do not require you to log in before you can use them. However, if you do not log in, you see the default profile. When you log in, you have full access to your personal settings and your directory. Any settings you change while logged in to a public phone are saved and displayed the next time you log in to any phone.

## *Procedure*

- 1 Select **Login**.
- 2 Do one of the following:
  - If you see the **User Login** screen, proceed to step 3.

- If you do not see the **User Login** screen, navigate to **Settings > Features > User Login > Log In**.

- 3 From the **User Login** screen, enter your user ID and password, and select **Log In**.

When your login credentials are accepted, your personal profile displays. If your credentials are not accepted, a message indicating your log in failed is displayed, and the User Login screen is displayed again. Check with your system administrator to confirm your login credentials.

## ***Log Out of the Phone***

After you finish using a public phone, make sure you log out to prevent access to your personal settings.

### ***Procedure***

- 1 Select **Log Out** or navigate to **Settings > Features > User Login > Log Out**.

The Log Out screen is displayed with a confirmation message.

- 2 Select **Yes**.

Your personal profile is no longer accessible, and either the User Login screen displays for the next user or the default profile displays.

## ***Change Your Login Password***

You can change your login password from any phone on your network.

### ***Procedure***

- 1 Log in to a phone on your network.
- 2 Navigate to **Settings > Features > User Login > Change User Login Password**.
- 3 On the **Change User Login Password** screen, enter your old and new password information and select **Enter**.

Your password is changed. The next time you log in to a phone, you need to enter your new password.

## **Locking Polycom Trio**

## **Locking Polycom Trio**

If your system administrator has set up to system to lock when it is not in use, you will need to unlock it before you can use the system.

Your system administrator provides you with a user password that you can use to unlock Polycom Trio.

When the system is locked, you can:

- Place outgoing calls to emergency and authorized numbers.
- Enter a password to answer incoming calls.

## **Related Topics**

[Logging Into and Locking the System](#)

[Place a Call from a Locked Phone](#)

[Answer a Call on a Locked Phone](#)

## ***Lock the Phone***

When you lock the system, you can choose to enable one of the following options:

- Allowing ringing when locked—incoming calls ring on the system, and you can answer calls by entering a user password.  
If you set up the system to allow you to answer incoming calls when locked, you can answer calls by entering your user password.
- DND when locked—Do Not Disturb applies to all lines and the system does not ring for incoming calls.

## ***Procedure***

- 1 Navigate to **Settings > Basic > Lock Phone**.
- 2 On the Lock Phone screen, select a setting.
- 3 Select **Lock**.

## ***Unlock the Phone***

Your system administrator provides you with a user password that you can use to unlock Polycom Trio systems.

## ***Procedure***

- 1 Select **Unlock**.
- 2 Enter your user password, or guest PIN if signed in as a guest on a host phone, and select **Unlock**.

## ***Change Your User Password***

You can change your user password at any time from the Advanced settings menu on Polycom Trio.

The Advanced settings menu requires a password to access the menu options. Ask your system administrator for the password if you cannot access menu.

### ***Procedure***

- 1** Navigate to **Settings > Advanced**.
- 2** Enter your user password and select **Enter**.
- 3** On the **Advanced** screen, select **Change User Password**.
- 4** On the **Change User Password** screen, enter your old and new user password and select **Enter**.

# Audio Calls

---

By default, the Polycom Trio system has one registered line. You can manage a maximum of 12 active, incoming, or held audio calls at a time on the line. However, you can have only one active call in progress with numerous other incoming calls or calls on hold.

## Placing Audio Calls

You can place calls on Polycom Trio in numerous ways, including local and international calls, calls from Recent Calls or directories, calls to contacts or favorites, or calls to authorized numbers on a locked phone.

### Related Topics

[Audio Calls](#)

### *Place an Audio Call*

On Polycom Trio, you can call a contact using a number or IP address using the dialpad or onscreen keyboard.

### Procedure

- 1 Select **Place a Call**.
- 2 Enter your contact's number, or tap the onscreen keyboard  and enter an IP address.
- 3 Tap .

### Related Topics

[Placing Audio Calls](#)

### *Place an International Call*

You can place calls to international phone numbers on Polycom Trio.

## Procedure

- 1 On the dial pad, quickly press the **star key** \* twice.  
A plus sign + is displayed.
- 2 Enter the phone number with the country code and tap .

## Related Topics

[Placing Audio Calls](#)

## ***Place a Call from Recent Calls***

You can place calls to contacts from the Recent Calls list, which contains calls that were recently placed, answered, or missed.

## Procedure

- 1 Do one of the following: .
  - From the Home screen, select  **Recent Calls**.
  - From the Place a Call screen, tap .
- 2 Select a contact.  
The call is placed automatically after you select a contact.

## Related Topics

[Placing Audio Calls](#)

[Recent Calls](#)

## ***Call a Favorite***

Contacts you add as favorites display at the bottom of the Home screen with an avatar. You can place a call to favorites by selecting a favorite on the Home screen.

## Procedure

- On the Home screen, tap a favorite.  
The call is placed to the favorite automatically.

## Related Topics

[Placing Audio Calls](#)

## ***Place a Call over Bluetooth***

When a Polycom Trio system is paired and connected with a Bluetooth-enabled mobile phone or tablet, you can place a call on your device and use the system as a speakerphone for the call.

### **Procedure**

- 1 Connect your device with the system over Bluetooth.
- 2 On your device, place a call to a contact and select **Polycom Trio** as your audio source..

## ***Calling Contacts from the Directory***

# **Calling Contacts from the Directory**

## Related Topics

[Placing Audio Calls](#)

## ***Call a Contact from a Directory***

You can place a call to a contact directly from your directory or you can select contacts in your directory to call from the Place a Call screen.

### **Procedure**

- 1 Do one of the following:
  - Navigate to **Contacts** and select a directory.
  - Navigate to **Place a Call**, tap , and select a directory.

- 2 Select a contact.
- 3 From the Details screen, tap  next to the number you want to call.

## ***Call a Contact from a Directory Search***

You can search for and call contacts from the Search screen in your directory.

### ***Procedure***

- 1 Select **Contacts** and select a directory.
- 2 In the Search field, enter your contact's first or last name.
- 3 Select your contact.
- 4 In the **Details** screen, tap  next to the number you want to call.

## ***Place a Call from a Locked Phone***

When the phone is locked, you can place outgoing calls only to emergency numbers, such as 911 and authorized numbers that your system administrator can set up. You cannot call any other numbers from a locked phone.

### **Procedure**

- 1 Select **New Call**.
- 2 From the **Place an Authorized Call** screen, select a number and select **Dial**.

### **Related Topics**

[Answer an Intercom Call](#)

## Place an Intercom Call

You can place an intercom call from Polycom Trio to quickly relay a message to a contact.

---

<b>Note</b>	Your system administrator can set up your phone to automatically call a specific contact when you select <b>Intercom</b> . If your phone is set up this way, select <b>Intercom</b> and wait for your contact to answer before speaking your message.
-------------	---

---

### Procedure

- 1 Select **Intercom**.
- 2 Enter a number or select a contact.
- 3 Tap .  
The phone plays a tone and the call is answered automatically on the contact's phone.
- 4 After the call is answered, speak your message then select  **Hang Up**.

## Place an Intercom Call During a Call

You can place an intercom call to another contact during an active call.

### Procedure

- 1 Select **Hold > Intercom**.  
The active call is placed on hold and the dialpad is displayed.
- 2 Enter a number or select a contact.
- 3 Tap .  
The phone plays a tone and the call is answered automatically on the contact's phone.
- 4 After the call is answered, speak your message and select  **Hang Up**.
- 5 Select  **Resume**.

# Redial a Number

Polycom Trio automatically keep a record of all calls placed. You can recall the last contact you called using Redial, if enabled by your system administrator.

## Procedure

- Do one of the following:
  - Select **Redial**.
  - Tap **Place a Call**, tap , and select the first number in the list.

## ***Answer a Call When in a Call***

When you are in an active call and an incoming call arrives on the same or a different line, a call waiting tone beeps, and the Incoming Call screen is displayed.

## Procedure

- Select  **Answer**.  
The active call is placed on hold, and the incoming call becomes active.

## Related Topics

[Answering Audio Calls](#)

## ***Answer Calls Automatically***

You can set up Polycom Trio to automatically answer calls using the Auto Answer feature.

When enabled, the phone automatically answers all incoming calls using the speakerphone. Your system administrator sets how many times the phone rings before the call is automatically answered.

When Auto Answer is enabled and you receive an incoming call while in a call, the incoming call is not answered until you end or hold the current call.

## Procedure

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Auto Answer**.
- 3 Select **Auto Answer SIP Calls** and select **Yes**.
- 4 Select **Microphone Mute** and choose **Yes** (the default setting) to mute the microphone for auto-answered calls.

- 5 Select **Video Mute** and select **Yes** to mute the video when video calls are auto-answered.
- 6 Select **Save**.

# End an Audio Call

You can end an active call on the system at any time.

However, you cannot end calls on hold. You must resume held calls before ending them.

## Procedure

- Do one of the following:
  - Tap  **Hang Up**.
  - In the Calls screen, select the call and tap  **Hang Up**.
  - In the Calls screen, select a held call, tap  **Resume**, and tap  **Hang Up**.

## Related Topics

[Audio Calls](#)

# Holding and Resuming Calls

## Holding and Resuming Calls

When you are in a call, you can place an active audio call on hold and resume the call.

When you place a call on hold, the Mute key indicators on the system and microphones are red. When you are placed on hold, the Mute key indicators on the system and microphones flash green.

### Related Topics

[Audio Calls](#)

### ***Hold a Call***

You can place any active call on hold on Polycom Trio.

### ***Procedure***

- During an active call, select  **Hold**.  
If you're in the Calls screen, select the call first.  
The Resume  icon is displayed.

### ***Resume a Call***

You can view and resume all held calls on the phone.

### ***Procedure***

- Do one of the following:
  - Select  **Resume**.
  - From the Calls screen, select the call and select  **Resume**.

# Transferring Calls

## Transferring Calls

You can transfer active or held calls to another person using the following transfer types:

- Blind transfer—Transfers the call directly to another line without speaking with the other party first.

- Consultative transfer—Enables you to speak with the other party before completing the transfer.

## Related Topics

[Audio Calls](#)

## Choose a Default Transfer Type

You can choose a default transfer type to use for all calls on Polycom Trio.

When you choose a default transfer type, the phone uses the selected transfer type for all calls. Consultative is the default transfer type.

### Procedure

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Default Transfer Type** and choose a transfer type.  
The selected transfer type is used for all calls.

## Transfer a Call

How you transfer a call on Polycom Trio varies depending on the default transfer type.

### Procedure

- During a call, do one of the following:
  - When the default type is Blind, select  **Transfer** and dial a number or select a contact from Recent Calls or Contacts.
  - When the default type is Consultative, tap  and select  **Transfer**. Dial a number or select a contact from Recent Calls or Contacts.

The call is transferred automatically.

## Transfer a Call using Consultative Transfer

How you transfer a call using Consultative Transfer varies depending on the default transfer type set on the Polycom Trio system.

### Procedure

- During a call, do one of the following:

- If the default type is Consultative, select  **Consult** and dial a number or select a contact from Recent Calls or Contacts. Select  **Complete Transfer** after speaking with the contact.
- If the default type is Blind, tap  and select  **Consult**. Dial a number or select a contact from Recent Calls or Contacts and select  **Complete Transfer** after speaking with the contact.

## ***Cancel a Transfer***

If a contact does not answer the transfer or you want to remain speaking with the contact on your line, you can cancel the transfer before it is complete.

## ***Procedure***

- Select **Cancel**.  
The call is not transferred and becomes active.

# **Forwarding Incoming Calls to a Contact**

## **Forwarding Incoming Calls to a Contact**

You can choose to forward an incoming call to a contact or forward all incoming calls to one of your contacts.

### **Related Topics**

[Audio Calls](#)

## ***Forward an Incoming Call to a Contact***

You can forward an incoming call directly to a contact without answering the call.

You cannot forward calls in this way on shared lines.

## ***Procedure***

- 1 In the **Incoming Call** screen, tap  and select **Forward**.
- 2 From the **Call Forwarding** screen, enter the forwarding number, and select **Forward**.

## ***Forward All Incoming Calls to a Contact***

You can set up your phone to forward all incoming calls to a contact using one of the following forwarding types:

- **Always**—Forwards all incoming calls.
- **No Answer**—Forwards all unanswered incoming calls.
- **Busy**—Forwards incoming calls when you're in a call.

For shared lines, you can only choose **Always** as your forwarding type; the other forwarding options are not available for shared lines.

### ***Procedure***

- 1 Select **Forward** or navigate to **Settings > Features > Forward**.
- 2 On the **Forwarding Type Select** screen, select a forwarding type.
- 3 Enter a contact's number or IP address, if enabled, and select **Enable**.
- 4 If you selected the **No Answer** option, enter the number of rings before the call is forwarded.  
The forwarding number or name of the contact you chose scrolls in the status bar. When you select **Always** as your forwarding option, the Forwarding icon  is displayed on the line.

## ***Disable Call Forwarding***

You can disable call forwarding when you no longer want to forward your calls.

### ***Procedure***

- 1 Navigate to **Settings > Features > Forward**.
- 2 On the **Forwarding Type Select** screen, tap **Disable Call Forwarding**.

## **Rejecting Calls with Do Not Disturb**

## **Rejecting Calls with Do Not Disturb**

Do Not Disturb (DND) enables you to set your phone to automatically reject calls when you don't want to be interrupted.

When you enable DND, you see the following:

- The DND icon  displays in the status bar.
- When the phone is idle, the DND icon displays next to your phone line.

- When the administrator enables hybrid line registration on the phone, you can choose **All** to enable DND on all the registered lines.
- If you have new messages or you have enabled call forwarding, the messages or forwarding icon display instead of the DND icon.

---

**Note** When you set your presence status to Do Not Disturb and enable DND on your phone, a message stating that your status is set to Do Not Disturb scrolls under the time display, and the DND icon does not display in the status bar.

---

## Related Topics

[Audio Calls](#)

## ***Enable Do Not Disturb***

You can enable DND to prevent your phone from ringing and to send all incoming calls directly to voicemail. All calls you receive while DND is enabled are logged in the Recent Calls list.

Enabling DND on shared lines disables ringing only. A visual notification of the call still displays, and you have the option to answer or ignore the call.

## ***Procedure***

- Do one of the following:
  - Tap **DND** on the Home screen, if enabled by your system administrator.
  - Navigate to **Settings > Features > Do Not Disturb**, and select **Enable**.

## ***Disable Do Not Disturb***

You can disable DND when you are ready to resume receiving calls again.

## ***Procedure***

- Navigate to **Settings > Features > Do Not Disturb** and select **Disable**.

# Managing Multiple Calls

## Managing Multiple Calls

You can manage multiple calls that are active, incoming, or held on the system.

In the Calls screen, you can view active and held calls, including conference calls. The following figure shows an active call and a held call.

Add

Mute

Hang Up

Hold

Transfer

Dialpad

### Related Topics

[Audio Calls](#)

## Manage a Call from the Calls Screen

From the Calls screen, you can manage a call by holding, resuming, or transferring the call.

### Procedure

- 1 Select a call.
- 2 Do one of the following:
  - Select  **Hold** to place an active call on hold.
  - Select  **Resume** to make a held call active.
  - Select  **Hang Up** to end a call with a contact. You can end active calls only, so resume the held call first before ending it.
  - Select  **Transfer** to send the call to another contact.

## Mute the Microphones

You can mute the microphone so other parties cannot hear you.

### Procedure

- Do one of the following:
  - Tap  **Mute**.
  - Tap the Mute key  on the system.
  - Tap the Mute key  on the microphone.

### Related Topics

[Audio Calls](#)

## Unmute the Microphone

Unmute your audio when you are ready to speak and let your contacts hear you.

## Procedure

- Do one of the following:
  - Tap  **Unmute**.
  - Tap the Mute key  on the system.
  - Tap the Mute key  on the microphone.

## Related Topics

[Audio Calls](#)

# Conference Calls

---

## Conference Calls

You can initiate and manage up to 12 audio conference calls on a Polycom Trio system and place video conference calls and view video streams for video-enabled participants.

## Tips for Conference Calls

When you are in a conference call, follow these tips:

- Mute your microphone when you are not speaking, especially in noisy environments.
- Avoid tapping or rustling papers near the microphone.
- Speak in your normal voice without shouting.

## Initiating Conference Call

You can initiate a conference call with up to four contacts, and you can hold, resume, or split a conference call.

While the system can manage up to 12 conference calls, you can have only one active conference call in progress with numerous other conference calls on hold.

If your system administrator enables the Conference Management feature on your phone, you can manage each participant in the call. With the Conference Management feature, you can mute, hold, and remove individual participants in a conference call.

### ***Initiate a Conference Call***

You can initiate a conference by adding a contact during an active call and joining the contacts into a conference call.

#### **Procedure**

- 1 Call a contact.
- 2 After the contact answers, tap **+ Add**.
- 3 Enter another contact's number or select a contact from Contacts or Recent Calls.  
The contact is added to the conference call after answering.

## ***Merge Calls into a Conference Call***

You can merge an active call and a held call to initiate a conference call.

### **Procedure**

- 1 In the Calls screen, tap a held call.
- 2 Tap  **Merge**.  
The held call is merged with the active call and a conference call is initiated.

## **Add Participants to a Conference Call**

You can add up to four contacts to a conference call.

### ***Procedure***

- 1 During a conference call, tap **Add Participants**.
- 2 Enter a contact's number or select a contact from Contacts or Recent Calls and select **Dial**.  
The contact is added to the call after answering.

## **End a Conference Call**

By default, when you end a conference call, your connection to the call ends and the other participants in the conference remain in the call.

However, your system administrator can set up your phone so that all connections terminate when you end a conference call.

### ***Procedure***

- During a conference call, select  **Hang Up**.

## **Hold a Conference Call**

When you place a conference call on hold, you place all conference participants on hold.

### ***Procedure***

- Select  **Hold**.

# Resume a Conference Call

Resuming a held conference call enables all participants to hear the audio of everyone on the call.

## Procedure

- Select  **Resume**.

# Mute a Conference Participant

If your system administrator has enabled the Conference Management feature, you can mute individual participants in a conference call.

## Procedure

- 1 During a conference call, select a participant.
- 2 Tap  **Mute**.

The muted participant can hear everyone, but no one can hear the muted participant.

# Remove a Conference Participant

If your system administrator has enabled the Conference Management feature, you can remove individual participants from a conference call.

## Procedure

- 1 During a conference call, select a conference participant.
- 2 Tap  **Hang Up**.

The participant is removed from the conference call.

# Video Calls on Polycom Trio Systems

---

When the Polycom Trio Visual+ content and video accessory is paired with the Polycom Trio 8500 or 8800 system, you can send video to your contacts with a connected USB camera and view video from contacts on a connected monitor.

Polycom Trio systems support the following USB cameras:

- Polycom® EagleEye™ Mini USB camera
- Polycom® EagleEye™ IV USB camera (Polycom Trio 8800 only)
- Logitech C930e webcam

If you do not have a USB camera connected to the Polycom Trio Visual+ when you receive video during calls, you can see your contact's video, but your contact cannot see video from you.

[http://support.logitech.com/en\\_us/product/webcam-c930e-business](http://support.logitech.com/en_us/product/webcam-c930e-business)

## Tips for Video Calls

Use these tips when you're in a video call:

- Check your video image to make sure it's clear, bright, and sharp.
- Avoid bright lights or windows behind you. If the camera faces a window or bright lights, adjust the camera settings.
- Avoid wearing bright colors, all-light or all-dark clothing, or busy patterns, such as small checks or narrow stripes. Pastels and muted colors look best on the screen.
- Use natural gestures and speak in a natural tone without shouting.
- Pause between sentences to allow for possible audio delay.
- During a conference call, mute your microphone when not speaking.
- Avoid tapping or rustling papers near the microphone.

### Related Topics

[Video Calls on Polycom Trio Systems](#)

# Video Call Settings

## Video Call Settings

You can update video settings to change the way video calls display on your Polycom Trio system. Note that if you update settings during a call, the new settings apply to the next call and not the current call.

---

<b>Note</b>	Some of the features described in this section require access to the Basic settings menu. If your phone requires a password to access the Basic settings menu, contact your system administrator for assistance.
-------------	--

---

### Related Topics

[Video Calls on Polycom Trio Systems](#)

## *Set the Call Rate for Video Calls*

You can set the maximum call rate to use for a video call and the selected call rate applies to your next video call.

Your system administrator can set a maximum call rate for video calls, and you cannot select a call rate above this limit. You can choose a call rate between 128 kbps and 768 kbps. The default setting is 512 kbps.

### *Procedure*

- 1 Navigate to **Settings > Basic > Call Rate**.
- 2 From the **Call Rate** screen, select the maximum call rate you want to use for video calls.

## *Change Video Clarity*

You can change the Target Frame Rate to improve video clarity.

The Target Frame Rate sets how smoothly your video displays. You can set a rate between 5 (least smooth) and 30 (smoothest). The default rate is 30.

### *Procedure*

- 1 Navigate to **Settings > Basic > Video**.
- 2 Select **Camera Settings > Target Frame Rate** and tap **Up** or **Down** to adjust the frame rate.

## *Set the Video Layout for the Meeting*

During a video call, you can choose how video from meeting participants display on the monitor.

You can choose any of the following meeting layout options:

- **Auto (default)**—The system chooses the best layout for the call.
- **Gallery View**—Up to five meeting participants display. If content is displayed when the maximum number of participants is active, the content replaces one participant. When there are less than five participants, self-view displays.
- **Picture-in-Picture**—Only self-view or the active speaker display. The PIP displays in or on the meeting content.
- **Fullscreen**—The video of the active speaker or the meeting content displays in full screen.

## ***Procedure***

- 1 During a video call, tap **Layout**.
- 2 Select a layout option.

## ***Change How Far-End Video Displays***

You can adjust video settings to control the appearance of video received from the far-end.

You can adjust the appearance of the far-side video so that it displays as one of the following:

- **Normal**—The video image displays with correct proportions. Black bars appear on the top, bottom, or sides of the area to maintain the correct aspect ratio if the aspect ratio of the received video does not match the display area. The portions of the video that are not being received display as black bars.
- **Full**—If the received video image is not the same aspect ratio as the display area, the video image is stretched to fill the area. If the aspect ratios match, no stretching occurs.
- **Crop**—The video image is resized to maintain the correct aspect ratio. Any parts of the image that do not fit within the display area are cropped.

## ***Procedure***

- 1 Navigate to **Settings > Basic > Video**.
- 2 Select **Video Screen Mode** and select a video screen setting.
- 3 Select **Save**.

## **Place a Video Call**

Depending on how the system is set up by your administrator, you can place a video call to one contact or add video during an audio call.

## Procedure

- 1 Tap **Place a Call**.
- 2 Enter a contact's number or select a contact from Contacts or Recent Calls.
- 3 Tap  or tap **Dial**.
- 4 In the Call screen, tap **Start Video**, if video does not display automatically.

## Related Topics

[Video Calls on Polycom Trio Systems](#)

[Place an Audio Call](#)

# Stop Sending Video

You can stop transmitting video at any time during a call.

Stopping video does not create an audio-only call. Even if you stop video, video information is still transmitted to the far-end and you are still in a video call. When you stop video, the stopped video icon  is displayed and the far-side cannot see you.

---

<b>Note</b>	You can't start and stop far-end video. If the phone is set up to receive far-side video, the far-end video always displays.
-------------	--

---

## Procedure

- In the Call screen, tap **Stop My Video**.

## Related Topics

[Video Calls on Polycom Trio Systems](#)

# Start Video During an Audio Call

You can start sending video at any point during an audio-only call if a camera is connected to the phone.

After you start sending video, you can mute your video, but you cannot stop sending video and return to an audio-only call.

## Procedure

- In the Call screen, tap **Start My Video**.

## Related Topics

# Adjust the Camera Position During a Call

You can control the position of a Polycom camera during or before a video call.

## Procedure

1 Do one of the following:

- During a call, select  **Camera**.

- Tap  and select **Camera**.

2 Select **Near** to adjust your camera or **Far** to adjust a call participant's camera.

3 Do one of the following:

- Use the onscreen arrows to adjust the camera position.
- Drag your finger across the onscreen video stream to adjust the camera position.
- Tap the onscreen video stream to move the camera to that position.
- Tap the plus sign to zoom the camera in or tap the minus sign to zoom the camera out.
- Move the slider to zoom the camera in or out.

## Related Topics

[Video Calls on Polycom Trio Systems](#)

# Switch Between Video and Content during Video Calls

By default, when you or a video participant starts sharing content during a video call on Polycom Trio, the content automatically displays in place of participant video streams during the call. You can choose to display the video streams for participants or display any content being shared.

---

<b>Note</b>	You cannot hide content that is shared using Apple AirPlay. If you try to hide content, depending on how the content is shared and the type of call, a message displays stating that you cannot hide content and must stop the content instead.
-------------	---

---

## Procedure

- In the Calls screen, tap **Toggle People/Content**.

## Related Topics

[Video Calls on Polycom Trio Systems](#)

# Handling a Mixture of Audio and Video Calls

When you are in a call with a person who has a video-enabled phone or video conferencing system, the participants' video displays on the connected monitor. For video calls with audio-only contacts, only your video stream displays on the monitor, and an Audio icon  displays on the monitor with the number of contacts on audio.

When you do not have a USB camera attached to the Polycom Trio Visual+, you can receive video, but you cannot send video. Video always displays when a contact can send video and the system is enabled to receive video.

## Related Topics

[Video Calls on Polycom Trio Systems](#)

# Camera Presets on Polycom Trio

You can store and modify camera presets on a Polycom Trio system with a connected Polycom camera.

Presets aren't supported with the Logitech Webcam C930e camera.

Camera presets are stored camera positions that you can create before or during a call. Presets enable you to quickly point a camera at pre-defined locations in a room and persist until you change them. The system uses preset 0 as the default camera position for all preset camera positions. This default camera position is zoomed out, panned straight ahead with horizontal tilt.

If your system camera supports pan, tilt, and zoom movement, you can create up to 10 preset camera positions for the near-end camera. Each preset stores the following information:

- Camera number
- Camera zoom level
- Camera direction
- Snapshot of the camera view

## Related Topics

[Video Calls on Polycom Trio Systems](#)

## Store Camera Presets

You can store camera presets during a call or when the Polycom Trio system is idle with a connected Polycom camera.

### Procedure

1 Do one of the following:

- During a call, select  **Camera**.
- Tap  and select **Camera**.
- On the Home screen, select **Camera**.

2 Adjust the camera to your desired position and zoom level.

3 Select **Presets**.

The available and stored preset positions display.

4 Press and hold a preset position numbered 0 to 9.

The new position displays immediately.

### Related Topics

[Camera Presets on Polycom Trio](#)

## Rename Stored Camera Presets

By default, presets are named in the order they are set, starting with "Preset 1". You can rename stored presets with a name that identifies the camera position or zoom level.

### Procedure

1 Navigate to **Settings > Basic > Video**.

2 Select **Camera Settings**.

3 Select **Presets**.

The available and stored preset positions display.

4 Select .

5 Select a preset and edit the name of the preset.

## **Related Topics**

[Camera Presets on Polycom Trio](#)

# Recording Audio Calls

---

You can connect a USB flash drive to a Polycom Trio system and record audio calls onto the drive.

Recordings are stored as .wav files on the USB flash drive, and you can record up to four hours in one file. You can replay recordings on the system or on a computer.

For a list of supported USB flash drives to record phone audio, see *Technical Bulletin 38084: Supported USB Devices* on [Polycom Support](#).

---

<b>Note</b>	If your phone does not detect the USB device when you insert it into the USB port, the USB port on your phone may be disabled. Contact your system administrator for assistance using the USB port.
-------------	---

---

## Guidelines when Recording Calls

The following is a list of guidelines to follow when recording audio calls:

- Inform contacts when you are recording a call.
- Make sure you mute your audio when you are placed on hold while recording the call. When you place a call on hold while recording, the recording pauses. However, when another person places you on hold, the recording continues.
- During an active call, pause your recording before answering incoming calls. All incoming calls you answer after you start recording are also recorded in the same file. For example, on June 22, 2012, at 11:22 a.m., you answer a call from person A. During your call with person A, you answer calls from person B and person C. All three calls are recorded in the same file.

### Related Topics

[Recording Audio Calls](#)

## Record a Call

You can record all active audio calls on the phone.

You cannot record calls when there are no connected calls, when you place a new call to transfer a call or initiate a conference, or when you have an incoming call. Make sure to inform your contacts on the call before you begin recording.

Note that some tones made on your contact's phone are recorded. When you mute the microphone while recording, your audio is muted and only other participants' audio in the call is recorded.

## Procedure

- During an active call, select  and select  **Start Recording**.  
The recording icon displays at the top of the Call screen.

## Related Topics

[Recording Audio Calls](#)

# Pause a Recording

You can pause a recording during a call at any time while the call is active.

## Procedure

- Select  and select  **Pause Recording**.  
The pause recording icon displays at the top of the Call screen.

## Related Topics

[Recording Audio Calls](#)

# Resume a Recording

When you resume a recording after pausing, the recording continues within the same file.

## Procedure

- Select  and select  **Resume Recording**.

## Related Topics

[Recording Audio Calls](#)

# Stop Recording

You can choose to stop recording a call before the call ends. The recording also stops when the active call ends, no matter who ended the call.

---

<b>Note</b>	Do not remove the USB flash drive while recording. The file being recorded will be incomplete and cannot be played back later. Removing the USB flash drive while recording can also damage the flash drive.
-------------	--

---

#### Procedure

- Do one of the following:
  - Select  and select  **Stop Recording**.
  - Select **Hang Up**.

When you stop recording, the USB icon is displayed in the status bar.

#### Related Topics

[Recording Audio Calls](#)

## Browse Recorded Calls

You can browse recorded files stored on the USB drive connected to supported Polycom Trio.

#### Procedure

- Navigate to **Settings > Features > Removable Storage Media > Browse Recordings**.  
A list of recordings display.

#### Related Topics

[Recording Audio Calls](#)

## Play a Recorded Call

You can play back calls that you recorded on a USB drive connected to supported Polycom Trio.

---

<b>Note</b>	You cannot open and play recordings when you are in an active call or if you're recording a call. If you try to, a message indicating that the action was canceled is displayed. Place the call on hold before playing the recordings. The recording stops playing when you resume the call.
-------------	--

---

#### Procedure

- 1 Navigate to **Settings > Features > Removable Storage Media > Browse Recordings**.

A list of recordings display.

- 2 Select a recording.
- 3 Select **Open > Play**.

The length of the recording and a progress bar is displayed as the recording plays.

#### Related Topics

[Recording Audio Calls](#)

## Pause and Resume Played Recordings

While playing a recording, you can pause the recording, perform another task on the phone, and resume the recording at any time.

When you receive an incoming call while playing a recording, the recording is paused automatically. If you do not answer or reject the incoming call, the recording remains paused until you select Resume.

#### Procedure

- 1 While the recording plays, select **Pause**.
- 2 Select **Resume** to continue playing the recording.

#### Related Topics

[Recording Audio Calls](#)

## Stop Playing a Recording

When you are finished listening to a recording, you can stop playing it by exiting the recording.

#### Procedure

- Select **Exit**.

#### Related Topics

# Sharing Content on Polycom Trio

---

When a Polycom Trio Visual+ is connected to a TV monitor and paired with a Polycom Trio 8500 or 8800 system, you can share content with in-room meeting participants and during audio or video calls.

You can use the following applications to share content:

- Polycom® RealPresence® Desktop
- Polycom® RealPresence® Mobile for Tablets
- Polycom® People+Content IP™
- Apple® AirPlay® (Polycom Trio 8800 only)
- Google Miracast® (Polycom Trio 8800 only)

## Sharing Content with RealPresence Desktop or Mobile

To share content during a call, you can use RealPresence Desktop on your laptop or RealPresence Mobile on your tablet. If you do not have either application, you can download RealPresence Desktop onto your laptop from the [RealPresence Desktop Support](#) page or download RealPresence Mobile from your tablet's application store.

Using RealPresence Desktop on your laptop, you can choose to share your monitor or share an open application.

Using RealPresence Mobile on your tablet, you can choose to share content from local documents, photos, a website, or Dropbox. You can also choose to share annotations you make on the Whiteboard or Blackboard application within RealPresence Mobile.

### Related Topics

[Sharing Content on Polycom Trio](#)

## Sharing Content with People+Content IP

## Sharing Content with People+Content IP

The People+Content IP application enables you to send content from a computer using the system's IP address.

Keep the following points in mind about People+Content IP:

- While People+Content IP supports any computer desktop resolution, video streamed to the system will be scaled to either 720p or 1080p.
- People+Content IP provides video-only content. No audio is shared.

## Related Topics

[Sharing Content on Polycom Trio](#)

## ***Download and Install Polycom People+Content Technology***

You need to download and install the Polycom® People+Content™ technology on a computer before you can use it to show content.

### ***Procedure***

- 1 On a computer, go to the [Polycom People+Content IP](#) page.
- 2 Download the People+Content IP software for Mac or PC.
- 3 Open the zip file and click on the application installation.
- 4 Follow the instructions in the installation wizard.

## ***Share Content using People+Content IP***

After you download and install People+Content IP, you are ready to share content.

### ***Procedure***

- 1 On your computer, do one of the following:
  - On a Windows computer, navigate to **My Computer** and click the **People+Content IP** folder.
  - On a Mac computer, navigate to **Finder** then search for and run the **People+Content IP** application.
- 2 Enter the IP address or host name of the Polycom Trio system and the meeting password, if one is set.
- 3 Click **Connect**.
- 4 Open the content you want to show and click .

## ***Stop Sharing Content with People+Content IP***

When you are done showing content, make sure you stop People+Content IP.

## Procedure

- Click  in the People+Content IP application.

## Share Content with People+Content IP over USB

You can connect your Windows or Mac computer over USB to the system and show content using the People+Content IP application. Video and data sent using the People+Content IP application is sent over the USB cable and no network connection is required. This is useful for environments where guest IP access is not allowed.

## Procedure

- 1 Connect a USB cable from the USB port on the Polycom Trio to the USB port on your computer. A folder with the People+Content IP application opens automatically.
- 2 If the application folder does not open automatically, on your computer, do one of the following:
  - On a Windows computer, navigate to **My Computer** and click the People+Content IP folder.
  - On a Mac computer, navigate to **Finder** then search for and run the People+Content IP application.
- 3 Open the content you want to show, and click .

## Sharing Content from an Apple Device

If your system administrator has enabled the Screen Mirroring feature on Polycom Trio 8800, you can share content locally from your Apple® AirPlay®-certified device during in-room meetings. Note that you can share content using AirPlay during calls, but the content will not display for far-end call participants.

In order to share content from your Apple device using AirPlay, your device must be on the same network as the Polycom Trio 8800 system. If your device is on a different network than the Polycom Trio 8800 system, you can connect to Polycom Trio 8800 with AirPlay using Bluetooth, but the network that the Apple device is on must be able to communicate with the Polycom Trio network. Contact your system administrator for additional help connecting with Polycom Trio 8800 using AirPlay.

The Polycom Trio solution supports the following AirPlay-certified Apple devices:

- iPhone®
- iPad®
- iPad Pro™
- MacBook Pro®
- Any other devices that support AirPlay

Sharing content with Polycom Trio using AirPlay works similar to sharing your screen to Apple TV. For more information on using AirPlay, refer to the documentation for your Apple product.

---

<b>Note</b>	When you answer an incoming call with content while you're sharing content wirelessly with AirPlay, your content stops showing, and the content with the connected call displays instead. After you end the call, you can start sharing content again locally using AirPlay.
-------------	--

---

# Sharing Content from a Windows or Android Device

If your system administrator has enabled the Screen Mirroring feature on Polycom Trio 8800, you can share content locally from your Miracast®-certified Android™ or Microsoft® Windows® device during in-room meetings. You cannot share content from your device wirelessly during point-to-point or conference calls.

The Polycom Trio solution supports the following Android and Windows devices:

- Microsoft Surface® 3 Pro and Surface 4 Pro
- Samsung Galaxy smartphones and tablets with software Android 4.2 or later.
- Devices with Miracast® support with software 4.2 or later
- Microsoft Windows 10 devices with Miracast support

For more information on sharing content wirelessly, refer to the documentation for your Android or Windows product.

---

<b>Note</b>	When you answer an incoming call with content while you're sharing content wirelessly on a Windows or Android device, your content will stop showing, and the content with the connected call displays instead. After you end the call, you can start sharing content again locally from your Windows or Android device.

# Meeting Reminders

## Meeting Reminders

When you have a scheduled meeting on the calendar, a meeting reminder displays and an alert tone plays 5 minutes and 1 minute before a meeting starts.

From the meeting reminder, you can view meeting details and join the meeting. The following figure shows a meeting reminder that displays before a meeting starts.

Figure 1. Meeting Reminder

---

<b>Note</b>	If you have enabled meeting reminders but the reminders do not display before meetings, make sure that your login credentials are correct.
-------------	--

---

## Related Topics

[Using the Calendar](#)

## *Choose a Meeting Reminder Type*

You can choose a meeting reminder type that determines if an alert tone plays each time a meeting reminder displays.

The following options are available for meeting reminders:

- Silent—The meeting reminder displays without an alert tone.
- Audible Once—An alert tone plays the first time a meeting reminder displays but does not play for any additional reminders.
- Audible Always (default)—An alert tone plays each time a meeting reminder displays.

## ***Procedure***

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Calendar Settings > Reminder Settings**.
- 3 Select **Reminder Type** and choose a meeting reminder type.

## ***Choose a Meeting Alert Tone***

You can choose the alert tone that plays for meeting reminders.

## ***Procedure***

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Calendar Settings > Alert Tone**.
- 3 Choose an alert tone and select **Play** to hear the tone.

## ***Disable Meeting Reminders***

Meeting reminders are enabled by default and display reminders for all meetings. You can choose to disable meeting reminders so they do not display for any meetings.

## ***Procedure***

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Calendar Settings > Reminder Settings**.
- 3 Select **Reminder > Disable**.

# **Joining Calendar Meetings**

# **Joining Calendar Meetings**

You can join any scheduled meeting from the calendar or from a meeting reminder.

## **Related Topics**

[Using the Calendar](#)

## ***Join a Meeting from the Calendar***

You can join meetings from the Calendar or from Meeting Details.

## ***Procedure***

- Do one of the following:
  - From the Calendar, tap **Join**.
  - Tap a meeting and tap **Join** in the Meeting Details screen

## ***Join a Meeting from a Meeting Reminder***

You can join a meeting from the meeting reminder when it displays before a meeting, if enabled.

## ***Procedure***

- Tap **Join**.

## ***Join a Meeting with an Alternate Number***

If the meeting organizer has provided alternate numbers you can use to join the meeting, you can view and use alternate numbers to join the meeting.

## ***Procedure***

- 1** Tap **Join** on the meeting reminder and select **More Actions**.
- 2** In the **Meeting Details** screen, choose a number.

# Call Lists and Directories

---

The Polycom Trio systems support a Recent Calls list, a Local Directory, and a Corporate Directory.

---

<b>Note</b>	The phone may not support all of the features described in this section. Check with your system administrator to find out which features are available.
-------------	---

---

## Recent Calls

### Recent Calls

The Recent Calls list on Polycom Trio includes missed, received, and placed calls. Each list holds up to 100 entries.

You can perform the following tasks from the Recent Calls list:

- Remove calls from the list.
- Select a call record to view call details.
- Select a call record to automatically call a contact.

#### Related Topics

[Call Lists and Directories](#)

[Place a Call from Recent Calls](#)

### ***View Recent Calls***

In the Recent Calls list, you can view a list of up to 100 missed, received, and placed call entries.

### ***Procedure***

- On the Home screen, tap **Recent Calls**.

### ***Edit a Recent Call Entry***

You can edit a contact's phone number stored in your Recent Calls list before returning the contact's call.

## ***Procedure***

- 1 Tap ⓘ next to a call entry.
- 2 Tap ✎.
- 3 Edit the number then tap **Dial**.

## ***Save a Recent Contact***

You can save a recent contact to the Contact Directory.

## ***Procedure***

- 1 Next to a call entry, tap ⓘ.
- 2 On the Call Details screen, tap **Save**.
- 3 If needed, edit the contact's information.
- 4 Tap **Save**.

## ***Delete a Recent Call Entry***

You can delete any call entry from the Recent Calls list.

If you delete or move call entries on the system, if enabled, the changes are made on the system only. If you delete call entries in the Skype for Business client, the changes are made on the system and in the Skype for Business client.

## ***Procedure***

- 1 Tap ⓘ next to a call entry.
- 2 Tap  **Delete Call**.

# **Local Directory**

# **Local Directory**

You can add and save contacts in the system's Local Directory, if allowed access by your system administrator.

Your system administrator can set the Local Directory as read-only or require a password for access to the directory. Contact your system administrator for assistance accessing or updating the Local Directory.

## Related Topics

[Call Lists and Directories](#)

[Add Corporate Directory Contacts to the Local Directory](#)

## ***Search for a Local Directory Contact***

In the Local Directory, you can enter a search criteria to find your desired contact.

### ***Procedure***

- 1 Navigate to **Contacts > Local Directory**.
- 2 In the Search field, enter your contact's name.  
Results matching your search display automatically.

## ***Add a Contact to the Local Directory***

When you add a contact to your Local Directory, you can choose how much information you want to enter for your contact. You are required to only enter a contact number for each new contact.

### ***Procedure***

- 1 In the Local Directory, tap **+**.
- 2 From the **Add Contact** screen, enter your contact's information in the available fields.
- 3 Select **Save**.

## ***View Contact Details***

From your Local Directory, you can view information for any contacts saved to the directory.

### ***Procedure***

- 1 Navigate to **Contacts > Local Directory**.
- 2 In the Local Directory, select a contact.  
The Details screen is displayed with the contact's name, number, and any additional information, such as a job title or email address.

## ***Update a Local Directory Contact's Information***

After you add a contact to your Local Directory, you can update the contact's information.

### ***Procedure***

- 1 From the Local Directory, select a contact.
- 2 On the Details screen, tap .
- 3 On the Edit Contact screen, update the contact's information.
- 4 Select **Save**.

## ***Delete a Local Directory Contact***

You can delete any contact from the Local Directory.

### ***Procedure***

- 1 From the Local Directory, select a contact.
- 2 On the Details screen, tap **Delete Contact**.
- 3 Select **Yes** to delete the contact.

## **Local Directory Favorites**

## **Local Directory Favorites**

Favorites are the contacts in your Local Directory that you will call most often.

Contacts that you add as favorites display on the Home screen. Only three favorites display onscreen at a time, however, you can swipe the screen from right to left to display additional favorites. Favorites also display at the top of the list of contacts in the Local Directory.

### **Related Topics**

[Call Lists and Directories](#)

### ***Add Favorites***

You can add any contact in the local directory as a favorite.

When you add a contact as a favorite, the contact displays on the Home screen.

## ***Procedure***

- 1 Navigate to **Contacts > Local Directory**.
- 2 Select a contact.
- 3 On the Details screen, tap ★.

## ***Remove a Favorite***

You can remove a favorite contact to make room for a new favorite.

When you remove a contact from your favorites, the contact is removed from the Home screen.

## ***Procedure***

- 1 Navigate to **Contacts > Local Directory**.
- 2 Select a contact.
- 3 On the Details screen, tap ★.

# **Corporate Directory**

## **Corporate Directory**

Your system administrator can set up your phone so that you can access a Corporate Directory, which lists contacts and groups within your company.

However, you cannot update the Corporate Directory, and your system administrator determines which contacts you can see. Check with your system administrator to find out if this feature is available.

---

<b>Note</b>	You may need to enter your user credentials to access the directory for the first time, if set by your system administrator.
-------------	--

---

### **Related Topics**

[Call Lists and Directories](#)

## ***Search the Corporate Directory***

You can search for contacts in the Corporate Directory using either their first name or last name.

## ***Procedure***

- 1 Navigate to **Contacts > Corporate Directory**.
- 2 In the search field, enter your search criteria and select **Submit**.

- 3 Select a contact and select **View** to view the contact's information.

## ***Perform an Advanced Search of the Corporate Directory***

An advanced search enables you to choose to search for contacts by first name, last name, or phone number.

### ***Before you begin***

Optionally, use a prerequisite.

### ***Procedure***

- 1 Navigate to **Contacts > Corporate Directory**.
- 2 In the **Corporate Directory**, select **AdvFind**.
- 3 In the search field, enter your search criteria and select **Submit**.
- 4 Select a contact and select **View** to view the contact's information.

## ***Add Corporate Directory Contacts to the Local Directory***

You can add contacts in the Corporate Directory to the Local Directory.

When you save a Corporate Directory contact to the Local Directory, the first name, last name, and phone number of the contact are automatically saved to the directory. You can add additional contact information after the contact is saved to the directory.

### ***Procedure***

- 1 In the **Corporate Directory**, search for a contact.
- 2 From the search results, select the contact and select **View**.
- 3 Select **Save**.
- 4 Enter any additional contact information and select **Save**.

[Local Directory](#)

# Searching the BroadSoft Directory

## Searching the BroadSoft Directory

You can access and search the BroadSoft Directory on the phone, and you can choose to perform a simple or advanced search for contacts.

After the system administrator configures the Enterprise directory, you can view a list of contacts by default in the BroadSoft directory. The default contacts list is displayed even when no text is entered in the search box of the directory.

### Related Topics

[Call Lists and Directories](#)

### *Perform a Simple Search of the BroadSoft Directory*

A simple search enables you to search for contacts using either their first name, last name, or by typing a few letters of their name. A maximum of 50 contacts are available for viewing at one time.

### *Procedure*

- 1 Navigate to **Contacts > BroadSoft Directory**.  
A default list of contacts is displayed.
- 2 In the search field, enter your search criteria and select **Submit**.

### *Perform an Advanced Search of the BroadSoft Directory*

An advanced search enables you to choose to search for contacts by first name, last name, or phone number.

### *Procedure*

- 1 Navigate to **Contacts > BroadSoft Directory**.  
A default list of contacts is displayed.
- 2 Select **Advanced Search** in the BroadSoft Directory.
- 3 On the **Advanced Search** screen, choose to search for a contact by first name, last name, or a contact number.
- 4 In the search field, enter your search criteria and select **Submit**.
- 5 Choose your contact.  
A contact details screen is displayed.

## ***Add BroadSoft Contacts to the Local Directory***

After you find your BroadSoft contact, you can add the contact to the Local Directory.

The first and last name and phone number of the contact are saved to the Contact Directory. You can go to the Contact Directory to see if the contact was saved correctly and to add additional contact information.

### ***Procedure***

- In the contact details screen, select **Add to local directory**.

# Voicemail and Pages

---

You can send, broadcast, and access a variety of audio messages on the system.

---

<b>Note</b>	Your system may not support all of the features described in this section. Check with your system administrator to find out which features are available on the system
-------------	--

---

## Access Voicemail Messages

When there are voicemail messages available on the phone, an audible tone plays and an alert displays on the Messages icon.

---

<b>Note</b>	For information on setting or changing the voicemail greeting or on remotely accessing your voicemail from the phone, contact your system administrator or service provider.
-------------	--

---

### Procedure

- 1 Navigate to **Settings > Features > Voicemail > Message Center**.
- 2 Select a line.
- 3 Select **Connect** and follow the voicemail prompts.

### Related Topics

[Voicemail and Pages](#)

## Receiving Messages with Group Paging

You can receive pages from any paging groups you are subscribed to. By default, you are subscribed to groups 1, 24, which is designated for Priority pages, and 25, which is designated for Emergency pages.

How you receive a page depends on the priority of the page, whether you are in an active call, and whether the phone is set to receive a page during an active call. When you receive a page, the page is always played through the speakerphone.

Your system administrator can define up to 25 paging groups and assign a label to each group to identify the phones in the group, such as All, HR Dept, Shipping Staff, or Executives.

Each group has one of the following priorities:

- Normal—By default, broadcasts sent to groups 1 to 23 are considered Normal broadcasts. By default, all phones are configured to receive broadcasts sent to group 1.
- Priority—By default, broadcasts sent to group 24 are considered Priority broadcasts. A Priority broadcast interrupts Normal broadcasts or active calls. All phones receive Priority broadcasts unless Do Not Disturb is enabled.
- Emergency—By default, broadcasts sent to group 25 are considered Emergency broadcasts. An Emergency broadcast interrupts Normal broadcasts, Priority broadcasts, and active calls and plays out at near maximum volume even if Do Not Disturb is enabled.

When you enable Do Not Disturb, you receive only Emergency broadcasts, and non-emergency broadcasts do not play or display.

## Related Topics

[Voicemail and Pages](#)

## *Listen to Pages during Active Calls*

How you handle a page when you are in an active call depends on the page priority and whether the phone is set up to receive a page during active calls.

The following occurs when you receive a page during a call:

- For Normal pages, the page immediately plays, and you hear audio from both the active call and the page.
- For Priority or Emergency page, the page immediately plays. You hear audio from the active call and the page.
- If the phone is not set up to receive Normal pages during active calls, the page is displayed as Pending.

---

<b>Note</b>	You adjust the volume of a Normal, non-emergency page while it plays, and the phone uses the adjusted volume for all subsequent non-emergency pages. However, only your system administrator can change the volume of an Emergency page.
-------------	--

---

## Procedure

- Do one of the following:
  - For pages that play automatically during a call, hold the call to hear only the page.
  - For Pending pages, select **Accept** or hold the call.

## Related Topics

[Receiving Messages with Group Paging](#)

## ***Receiving Pages When You're Not in an Active Call***

When you receive a page and you are not in an active call, the page immediately plays, regardless of the paging priority.

While a page plays, you can:

- Hold the page.
- End the page. This ends the page at your phone only.
- Place a new call.

### **Related Topics**

# Connecting Bluetooth and USB Devices

---

You can connect a USB or Bluetooth-enabled laptop or mobile device to a Polycom Trio 8500 or Polycom Trio 8800 system. You can also connect Bluetooth-enabled devices to Polycom Trio 8800 systems using Near Field Communication (NFC) .

When you connect a device to the phone, you can use it as your microphone for audio and video calls and as a speaker for calls, music players, and videos.

## Connecting Devices using Bluetooth

The Bluetooth feature on Polycom Trio systems enables you to place calls on your mobile phone and use the system as a speakerphone for the call. You can also use the system to play audio from media, such as music or videos, from your mobile phone or tablet.

---

<b>Note</b>	The Polycom Trio system does not automatically reconnect to previously paired Bluetooth devices after the device is disconnected from the system or after a system reboot. You must manually reconnect and pair the Bluetooth device with the Polycom Trio system.

## ***Setting Polycom Trio as Your Audio Device***

# **Setting Polycom Trio as Your Audio Device**

In order to use a PolycomTrio system to play audio from calls or media on your connected laptop, you need to set the system as your audio communication device.

The following sections provide information on setting the system as your audio device for your laptop and communication and collaboration clients such as RealPresence Desktop or the Skype for Business client.

### **Related Topics**

[Connecting a Device using a USB Cable](#)

## ***Setting the System as Your Audio Device for Communication Clients***

When your laptop is connected to a Polycom Trio system, you can set the system as your microphone and speakers for communication and collaboration clients, like RealPresence Desktop, BroadSoft BroadTouch Communicator, or Skype for Business.

Depending on the capabilities of the client, you can use the system to accept, hold and resume, and end calls placed and received in the client. Note that the status of the calls may differ between the client and the system depending on the capabilities of the client.

## ***Set the System as Your Audio Device in RealPresence Desktop***

When your laptop is connected to a Polycom Trio system, you can set the system as your audio device input and output device in the RealPresence Desktop application to play audio from the meeting using the system speakers and use the system as your microphone.

If you do not have the RealPresence Desktop application, download the application from the [RealPresence Desktop Support](#) page.

### ***Procedure***

- 1 In RealPresence Desktop, click  and click **Audio Device**.
- 2 For **Audio input device (microphone)**, click **Polycom Trio** from the drop-down list.
- 3 For **Audio output device (speakers)**, click **Polycom Trio** from the drop-down list.
- 4 Click **OK**.

## ***Set the System as Your Audio Device for Skype for Business***

When your laptop is connected to a Polycom Trio system, you can set the system as your microphone and speakers for Skype for Business calls you place on your laptop.

### ***Procedure***

- 1 In the Skype for Business client, click  and click **Tools > Audio Device Settings**.
- 2 Select **Polycom Trio** from the drop-down list as the device you want to use for audio calls.

### ***Set the System as the Default Device for Your Laptop***

When your laptop is connected to a Polycom Trio system, you can set the system as the default device for your laptop and play audio from music and videos using the system's speakers.

### ***Procedure***

- 1 On your laptop, click **Start > Control Panel**.
- 2 In the **Control Panel**, click **Hardware and Sound > Sound**.
- 3 Click **Polycom Trio** and click **Set as Default Device**.
- 4 Click **OK**.

Any audio from music or videos plays on the system.

# Polycom Trio Settings

---

You can make some basic customizations on the phone, which includes changing the time and date format, setting a language, and adjusting the screen brightness.

## Password Required to Customize Your Phone

Many of the features available on Polycom Trio can be enabled or customized from the Basic settings menu. However, if your system administrator has set up the phone to require a password to access the Basic settings menu, you cannot change settings without the permission of your system administrator. Contact your system administrator for assistance enabling or customizing features.

[Set the Time and Date Format](#)

## *Change the Time and Date Format*

You can customize the time and date by choosing between a variety of time and date formats, including options to display the day, month, or year.

## **Procedure**

- 1 Navigate to **Settings > Basic > Preferences**.

2 Select **Time & Date** and select one of the following:

- Select **Clock Date** to change the date format.
- Select **Clock Time** to change the time format.
- Select **Clock Order** to change the order of the time and date display.

3 From the **Clock Date**, **Clock Time**, or **Clock Order** screen, select the format you want.

## ***Disable the Time and Date Display***

You can turn off the time and date display so that they do not display at all.

### ***Procedure***

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Time & Date** and select **Disable**.

## **Set the Language**

Polycom phones support several languages that you can choose to display on the phone.

Check with your system administrator to find out exactly which languages are supported on your phone.

### **Procedure**

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Language** and select a language.  
The language on the phone updates immediately.

## ***Set the Backlight Intensity***

You can change the Backlight On intensity and the Backlight Idle intensity separately. You can also choose a high, medium, or low intensity, or turn off the backlight entirely. When you change the Maximum Intensity, you modify the entire backlight intensity scale. For example, if you decrease the Maximum Intensity, the low, medium, and high levels for both Backlight On and Backlight Idle intensities decrease.

## ***Procedure***

- 1 Navigate to **Settings > Basic**.
- 2 Select **Backlight Intensity > Backlight On Intensity**.
- 3 Select the intensity you want, and select **Back**.
- 4 From the **Backlight Intensity** screen, select **Backlight Idle Intensity**.
- 5 Select the intensity you want, and select **Back**.
- 6 From the **Backlight Intensity** screen, select **Maximum Intensity**.
- 7 Select **Up** or **Down**, or drag your finger along the slider to increase or decrease the maximum intensity.

## ***Set the Backlight Timeout***

The backlight automatically turns on with any phone activity. By setting the Backlight Timeout, you can determine how long the phone should be idle before the backlight dims to its Backlight Idle intensity. By default, the backlight dims after the phone is idle for 40 seconds.

## Procedure

- 1 Navigate to **Settings > Basic**.
- 2 Select **Backlight Timeout**.
- 3 Select the number of seconds the phone is idle before the backlight dims.

## Format Numbers

By default, the phone automatically formats phone numbers based on the amount of numbers entered. For example, 17235439078 is reformatted as +1 (713) 543-9078.

### Procedure

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Number Formatting**.
- 3 Select **Enable** or **Disable**.

## Power-Saving Mode

## Power-Saving Mode

By default, Polycom phones are set to enter power-saving mode and turn off the screen after being idle for a certain period of time to conserve energy.

You can determine the period of time that the phone is idle before the screen turns off, and you can set different idle timeouts for office hours and off hours, such as evenings and weekends. When power-saving mode is activated, the phone exits power-saving mode if an event occurs—for example, if there is an incoming call or message. If a screen saver is enabled, power-saving mode still occurs.

You can update the following power-saving settings:

- **Office Hours**—When you start work and how long you're in the office each day.
- **Timeouts**—The period of time the phone should be idle before the screen turns off.

---

<b>Note</b>	By default, the Polycom Trio 8500 and 8800 systems enter power-saving mode after a period of idle time to conserve energy. However, Polycom Trio systems do not enter power-saving mode while idle in the Bluetooth or Wi-Fi (Polycom Trio 8800 only) menus. To ensure the system enters power-saving mode, exit the Bluetooth or Wi-Fi menu using the Home or Back key.

## ***Change Your Office Hours for Power-Saving Mode***

When you update your office hours, you specify when you start and how long you work each day. After your work hours, the phone is idle and goes into power-saving mode.

### ***Procedure***

- 1 Navigate to **Settings > Basic**.
- 2 Select **Power Saving > Office Hours** and select **Start Hour**.
- 3 Select a day of the week, and using the 24-hour clock, enter a start time from 0 to 23.
- 4 Select **Save**.
- 5 From the **Office Hours** screen, select **Duration**.
- 6 Select a day of the week and enter a duration of 0 to 12 hours per day.
- 7 Select **Save**.

## ***Change Idle Timeouts for Power-Saving Mode***

You can update the period of time the phone is idle before the screen turns off.

You can specify different timeouts for office hours (Office Hours Idle Timeout) and non-office hours (Off Hours Idle Timeout). By default, the Office Hours Idle Timeout is much longer than the Off Hours Idle Timeout.

You can also specify a separate timeout period that applies after you press a key or tap the screen. This is called the User Input Idle Timeout. You can choose to set a higher User Input Idle Timeout than the Office Hours and Off Hours Idle Timeouts so that when you're actively using the phone, power-saving mode doesn't initiate as often.

---

<b>Note</b>	If you press a key or tap the screen, the idle timeout period that applies (User Input Idle Timeout or Office Hours/Off Hours Idle Timeout) is the timeout with the highest value.
-------------	--

---

### ***Procedure***

- 1 Navigate to **Settings > Basic**.
- 2 Select **Power Saving > Timeouts**.
- 3 Select **Office Hours Idle Timeout** and enter the number of minutes (1 to 600 minutes) the phone should wait during office hours before starting power-saving mode.
- 4 Select **Off Hours Idle Timeout** and enter the number of minutes (1 to 10 minutes) the phone should wait during off-hours before starting power-saving mode.

- 5 Select **User Input Idle Timeout** and enter the number of minutes (1 to 10 minutes) the phone should wait after a key press or screen select before starting power-saving mode.
- 6 Select **Save**.

## Control Where Audio Plays

When a Polycom Trio system is paired with Polycom Trio Visual+, you can choose to have audio play from the speakers on a Polycom Trio system or from the monitor or external speakers connected to Polycom Trio Visual+.

You can also choose one of the following options to control where to play audio from audio and video calls:

- **Phone Speakers**— The system plays audio on the system only.
- **TV Speakers**— The system plays audio from the connected monitor or external speakers.
- **Automatic**— The system automatically chooses where to play audio based on the call type.

This feature is not available when the system is not paired with Polycom Trio Visual+.

### Procedure

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Audio Output** and choose an output option.

## Set a Ringtone for Incoming Calls

A simple way to personalize your phone is to change the ringtone. You can pick unique ringtones for the different lines on the phone. The default ringtone is Low Trill.

### Procedure

- 1 Navigate to **Settings > Basic > Preferences**.
- 2 Select **Ring Type**.
- 3 From the **Ring Type** screen, select a ringtone.
- 4 Select **Play** to hear the ringtone.

# Maintaining Polycom Trio

---

When the phone is not operating properly, you can investigate or troubleshoot issues along with any other tasks your administrator may ask you to perform.

## Investigate Warnings

When a phone is unable to perform certain tasks, a Warning icon displays in the status bar and on the Settings icon on the Home screen.

The warning icon lets you know that your phone has one or more important issues. You can view details about the issues from the Warnings screen.

### Procedure

- 1 Navigate to **Settings > Status > Diagnostics**.
- 2 Select **Warnings**.

The **Warnings** screen is displayed listing any issues.

## Restart Your Phone

Your system administrator may ask you to restart the phone if it malfunctions or to assist in troubleshooting.

---

<b>Note</b>	Before you restart the phone, contact your system administrator. If the phone is malfunctioning, you may be able to restore normal operation without restarting it. Additionally, your system administrator may want to troubleshoot the phone before you restart it. You do not need to restart the phone to update its configuration.
-------------	---

---

### Procedure

- 1 Navigate to **Settings > Basic**.
- 2 Select **Restart Phone**.

A confirmation message is displayed.

**3 Select Yes.**

The restart process begins, and the process ends when the Home screen is displayed.

[Update the Phone's Configuration](#)

## **Update the Phone's Configuration**

Your system administrator may ask you to update the configuration for your phone to apply any changes to system settings, which you can do without restarting it.

#### **Procedure**

**1** Navigate to **Settings > Basic**.

**2** Select **Update Configuration**.

A confirmation message is displayed.

**3** Select **Yes**.

The configuration is updated. The phone may restart, depending on which settings have changed.

## **Test the Hardware**

If your phone is having any issues, your system administrator may ask you to access a diagnostics menu on the phone to test its hardware.

You can test the display, microphones, and speaker. Contact your system administrator for instructions on how to perform these tests.

#### **Procedure**

**1** Navigate to **Settings > Status > Diagnostics**.

2 Select **Test Hardware** and select one of the following:

- **Audio Diagnostics**
- **Display Diagnostics**
- **Touch Screen Diagnostics**

# Clean the Touchscreen

The phone screens require minor maintenance, but you may need to clean the screen periodically.

Use a clean, dry, microfiber cloth—the kind you would use to clean glass surfaces—to wipe the screen. Do not use chemicals to clean the screen.

Before you clean the screen, you need to disable it so you don't activate phone functions while you wipe the touchscreen.

## Procedure

- 1 Navigate to **Settings > Basic**.
- 2 Select **Screen Clean**.
- 3 Wipe the screen with a clean, dry, microfiber cloth.
- 4 Press any key on the phone dial pad to enable the touchscreen again.

---

<b>Note</b>	If the screen is still dirty after cleaning, dampen a soft, lint-free cloth with an isopropyl alcohol and water solution of 50:50 then wipe the screen with the cloth. Always use the dampened cloth to apply the solution; never apply the solution directly because it could seep inside the screen or stain the system. Do not use chemicals to clean the screen.

# Accessibility Features

---

Polycom products include a number of features to accommodate hearing, vision, or mobility-impaired users.

## Features for Hearing-Impaired Users

Polycom phones include many features that enable users with hearing impairments to use various features on the phone.

The following table lists the accessibility features for hearing-impaired users.

Table 1. Accessibility Features for Hearing-Impaired Users

Accessibility Feature	Description
Visual message indicators	Icons on the screen indicate when the system has new messages.
Adjustable ring tone and volume	You can choose from a variety of ring tones for the phone. You can also change the volume of the ringer to suit your needs and choose different ring tones for contacts.
Adjustable Call Volume	While in a call, you can raise or lower the volume of the device.
Visual notifications	Status and icon indicators let you know when you have incoming, outgoing, active, or held calls. Indicators also alert you of the device's status and when features are enabled.
Headset Memory Mode	If you use a headset, you can set up your phone to use your headset for all calls.

Accessibility Feature	Description
TTY support	The phones supports commercial TTY devices such as Ultratec Superprint. Additionally, the phones provide acoustic coupled TTY support.

# Features for Vision-Impaired and Blind Users

Polycom phones include various features that enable users with visual impairments to use many of the features on the phone.

The following table lists the accessibility features for visually-impaired and blind users.

Table 1. Accessibility Features for Vision-Impaired and Blind Users

Accessibility Feature	Description
Adjustable backlight settings	You can change the brightness of the screen by adjusting backlight intensity settings.
Auto-answer feature	You can enable the phone to auto-answer calls.
Plastic overlay	A plastic overlay is available for placement on the touchscreen for the volume keys to assist with adjusting the volume.
Illuminated feature keys	Many feature keys illuminate when activated to alert you when a feature is enabled.
Microphone mute feature	The system plays an alert when you mute or unmute the microphones using any of the Mute keys on the device or far-end system. The system plays an alert periodically if the device is muted for a set period of time.

# Troubleshooting

---

If you are having issues with your Polycom phone, you can try the troubleshooting options and solutions in the following topics to resolve certain issues.

## Check the Status of Polycom Trio Visual+

If yours or the far-end's video stream or content is not displaying on the monitor, you need to check the status of the Polycom Trio Visual+ and make sure the accessory is on and paired with the Polycom Trio system.

### Procedure

- 1 On the system, navigate to **Settings > Status > Networked Devices**.
- 2 Make sure that the Paired Device is **Connected**.  
If the paired device is not connected, contact your system administrator.

## Check the Status of the Calendar

When you do not see the Calendar icon on the Home screen, or if you are not receiving meeting reminders, it is possible that the phone is not connected to the Microsoft Exchange Server.

### Procedure

- 1 Navigate to **Settings > Status > Calendar**.
- 2 On the Calendar screen, make sure the **Status** field includes **Connected to Server**.  
If the status reads that it is not connected to the server, contact your administrator.

# Tips for Resolving Camera Issues

If the USB camera is not working during a video call, try one of the following solutions:

- Check that the Polycom Trio Visual+ accessory is paired and connected with the Polycom Trio system.
- Disconnect the USB camera from the Polycom Trio Visual+ then reconnect the camera.
- Make sure the USB camera is a supported camera:
  - Polycom® EagleEye™ Mini USB camera
  - Polycom® EagleEye™ IV USB camera (Polycom Trio 8800 only)
  - Polycom® EagleEye™ Director II camera system (Polycom Trio 8800 only)
  - Logitech C930e webcam
- Contact your system administrator for additional help.
